UBER DATA ANALYSIS DASHBOARD : POWER BI MAIN PROJECT

Project Objective

The objective of this project is to analyze Uber ride data of the year 2025 to understand:

- Revenue performance
- Booking trends
- Cancellation behavior
- Customer insights
- Vehicle performance
- Location-based demand patterns

The dashboard helps stakeholders make **data-driven decisions** to improve revenue, reduce cancellations, and optimize operations.

Data Model Explanation

The model follows a **simple star schema**:

- uber_data → central fact table containing bookings, revenue, distance, and status.
- Date_tbl → used for time intelligence (Month, Quarter analysis).
- veh_image → used for vehicle categorization and visuals.

This structure improves:

- Query performance
- Easier DAX calculations
- Clear relationship structure

---

1. Overview Page

Purpose:

Provides a high-level summary of Uber's overall performance.

Key KPIs:

- Completed Bookings: 92.6K
- Lost Bookings: 56.8K
- Total Bookings: 148.8K

- Revenue: 51.8M
- Avg Distance: 24.64 km

Insights:

- Around 62% bookings are completed.
- Significant lost bookings indicate operational inefficiencies.
- Revenue is stable month-to-month (~4M–4.5M).

Additional Metrics:

- Top Pickup Location
- Top Drop Location
- Customer & Driver Rating

This page gives management a quick performance snapshot.

---

2. Vehicle Page

Purpose:

Compare vehicle performance.

Key Analysis:

✓ Revenue Contribution %

- Auto & Bike contribute highest revenue share.

✓ Completed vs Lost Bookings by Vehicle

- Some vehicle types have higher cancellation ratios.

✓ Revenue by Month & Vehicle

- Auto & Bike show consistent monthly earnings.
- Uber XL contributes lowest revenue share.

Insight:

Vehicle mix impacts revenue stability and cancellation rates.

---

3. Revenue Page

Purpose:

Analyze revenue drivers and earning patterns.

Key Visuals:

✓ Revenue by Month

- February shows a slight dip.
- Revenue remains consistent across most months.

✓ Revenue by Time Slot

- Peak revenue during 6 PM – 9 PM.
- Lowest revenue during 12 AM – 3 AM.

✓ Revenue by Payment Method

- UPI generates highest revenue.
- Digital payments dominate over cash.

✓ Top 10 Locations by Revenue

- Helps identify high-performing zones.

Insight:

Evening hours and digital payments drive most revenue.

---

4. Rider Page

Purpose:

Understand customer behavior and cancellation patterns.

Metrics:

- Total Customers: 104.1K
- Successful Customers: 64.6K
- Customer Cancelled: 10.5K
- Driver Cancelled: 27K

Rider Segmentation:

- First Time Riders
- Return Riders
- Regular Riders

Cancellation Analysis:

- Monthly cancellation trends
- Breakdown by driver & customer reasons

Insight:

Driver cancellations are significantly higher than customer cancellations — indicating possible driver-side operational issues.

---

5. Location Page

Purpose:

Analyze geographic demand and distance patterns.

Key Insights:

✓ Total Distance by Month

- Slight fluctuation but stable performance.

✓ Peak Booking Hours by Day

- Highest bookings during 6 PM – 9 PM.
- Weekend evenings show highest demand.

✓ Pickup vs Drop Toggle

- Dynamic comparison of demand locations.

Business Value: Helps optimize:

- Driver allocation
- Surge pricing strategy
- Area-based promotions

Key Findings

1. Revenue is stable but cancellations are high.
2. Evening time slots generate highest income.
3. Driver cancellations exceed customer cancellations.
4. Digital payments dominate.
5. Certain locations consistently generate higher revenue.
6. Auto & Bike categories drive majority of revenue.

Business Recommendations

- Reduce driver cancellations via incentive programs.
- Increase driver availability during 6 PM – 9 PM peak hours.
- Focus promotions on top revenue locations.
- Improve retention strategies for first-time riders.
- Optimize vehicle allocation based on demand patterns.

Conclusion

This dashboard transforms raw Uber booking data into actionable insights.

It enables:

- Revenue optimization
- Operational efficiency improvement
- Strategic decision-making

The project demonstrates strong understanding of:

- Data modeling
- DAX calculations
- KPI development
- Business storytelling
- Dashboard design principles
